Togg

T10X

Togg
ecosystem

Your third living space

The T10X invites you to join the Togg ecosystem with its range of advanced driving features. The T10X is not just a vehicle. It offers a space to work, study, and socialise. It provides a third living space outside of your home and workplace.

A smart device

The T10X is not just a car; it is a smart device connected to the Togg ecosystem, offering solutions that make your life easier.

Connected

The T10X is constantly connected to the internet thanks to its advanced technology, keeping you online at all times, regardless of where you are.

The Trumore digital platform is totally integrated with the T10X, providing access to the Togg ecosystem.

Trumore Digital Platform

The entire Togg ecosystem is available to you with Trumore in the T10X. Trumore constantly updates itself according to your user habits and develops innovative new applications. This continuously enriches your Togg user experience.

Trumore Login

The Trumore Login platform is your unique Togg ecosystem identity, giving you access to personalized services and a customized mobility experience.

Trumore Go.More

Trumore Go.More offers a unique user experience by combining real-time navigation features with mobility services from business partners.

Tru.Store Connected vehicle services

With TruStore app store in the T10X's infotainment system, you can download the vehicle apps you want to your smart device without needing a cell phone.

Trumore "My Smart Device"

With Trumore "My Smart Device," a feature that integrates seamlessly with T10X, you can control your device remotely and access information that is of particular interest to you via your smartphone.

High-speed Data Volume

The T10X, which is constantly connected to the Internet thanks to its modern technology, allows you to be online anywhere and anytime at high data speeds.

Can.ai Digital voice assistant

Developed with Can.ai technology, the voice assistant allows you to control numerous functions via voice command, from music selection and air conditioning settings to vehicle information.

Trumore Digital Art Gallery

Turn your T10X into a mobile art gallery with this app, where you can easily find works by world-renowned digital artists. This mobile gallery allows for customization and takes you on a personalized journey through the digital world.

Technology
and comfort
about T10X

Panoramic display

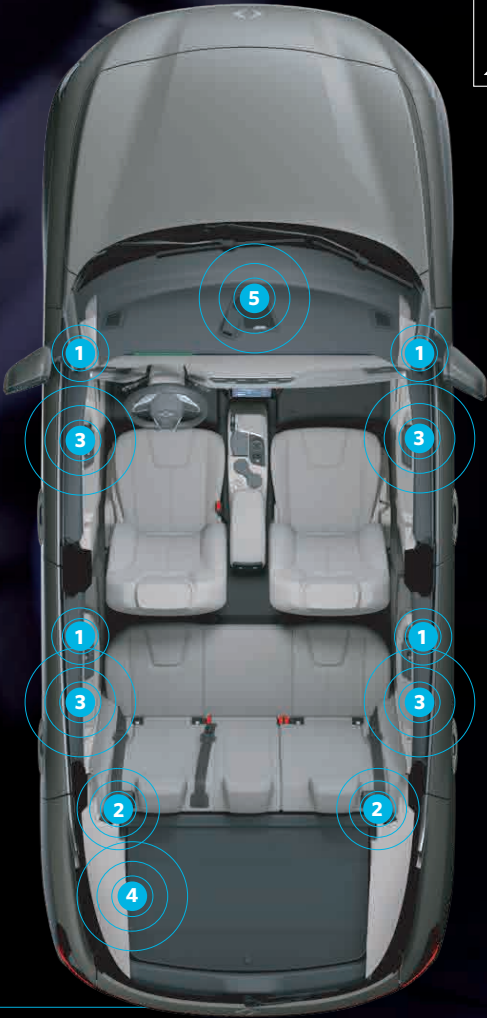

The T10X's digital cockpit is composed of a 12.3-inch digital instrument cluster, a unique 29-inch infotainment screen that envelops the driver and the front passenger, and an 8-inch control screen that assists with the control of all functionalities. The digital cockpit takes your driving experience, travel comfort, and online life to another level while also providing access to entertainment content that can be controlled by the front passenger.

Meridian Premium Sound System

With the new generation Meridian Premium Sound System's advanced acoustic set-up and technology exclusive to the T10X, you can enjoy a superior audio experience on your journeys.

- 1 **TWEETER**
High audible frequencies, covering the upper limit of human hearing.
- 2 **SURROUNDS**
Life-like sense of immersion.
- 3 **WOOFER**
Low frequencies for punchy, tight bass and drums.
- 4 **SUBWOOFER**
Optimal bass response in all listening locations.
- 5 **CENTRE SPEAKER**
Large and stable soundstage in all locations.

Keyless entry

The T10X provides keyless entry. Accessing your T10X is as simple as touching the front door handles or the tailgate release button on the tailgate cover, without needing to take the key out of your pocket or purse.

Heated front/rear seats

The heating system in the front and rear seats of the T10X provides a warm and comfortable travel experience for all passengers.

Electric front seats with memory function

With the T10X, you can easily adjust your seat position and save these settings for future use. This feature enables multiple users to adjust their seat positions with just a single button, allowing for a quick and convenient way to get your position just right.

Electric tailgate

Operating the tailgate of your T10X is now more effortless than ever. Simply press the button on your key or on tailgate, and the it opens or closes automatically.

Wireless charging

The wireless charging unit situated on the front console of your T10X offers speedy charging for your phone and devices.

Driving assistance systems

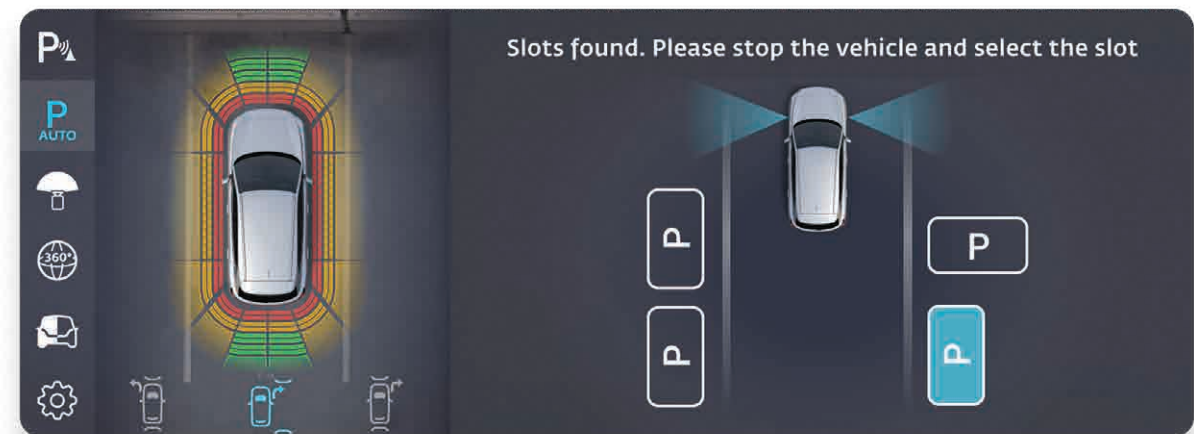

The T10X's advanced driver assistance systems constantly improve themselves by learning about your usage habits and movements. By processing your long and short-term usage data through the T10X's and Togg ecosystem's AI, you can enjoy an improved assistant experience.

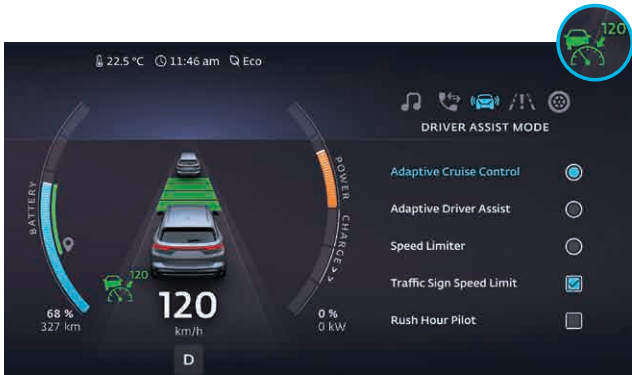

Blind spot assistant

Two radars located at the rear detect vehicles approaching from adjacent lanes and transmit this information to the user through warning lights located on the side mirrors. If the driver signals a lane change at such a time, the warning lights will flash to prevent a potential collision.

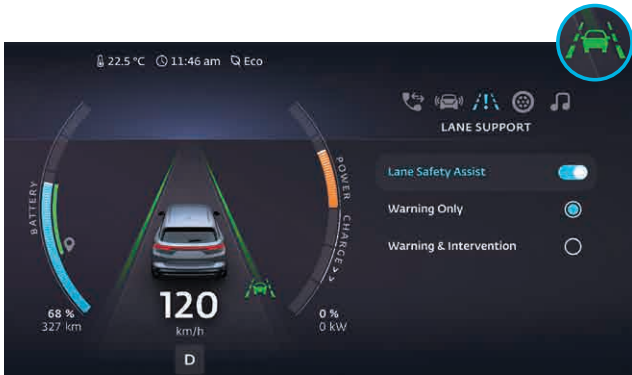

Automatic parking assistant

This system enables autonomous parking without user intervention, working with the aid of parking sensors. The T10X takes control of the throttle, brake, steering, and gear shifting for parking and exiting a parking space. You can easily monitor any parking-related information, such as the current parking status and any conditions that may require user intervention, directly from the device screen. This assistant can be used for both parking and exiting a parking space.

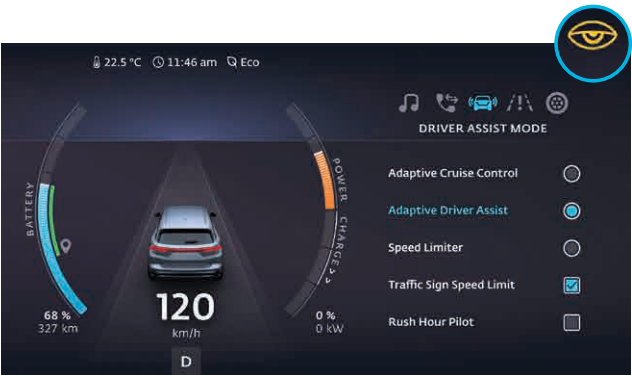

Intelligent adaptive cruise control with stop-go function

The adaptive cruise control automatically adjusts the driving speed according to the traffic ahead, which provides users with a unique driving experience. If the device comes to a complete stop, the system will continue to track the road with a command from the user. The smart adaptive cruise control system can also identify speed limits with the help of traffic sign detection.

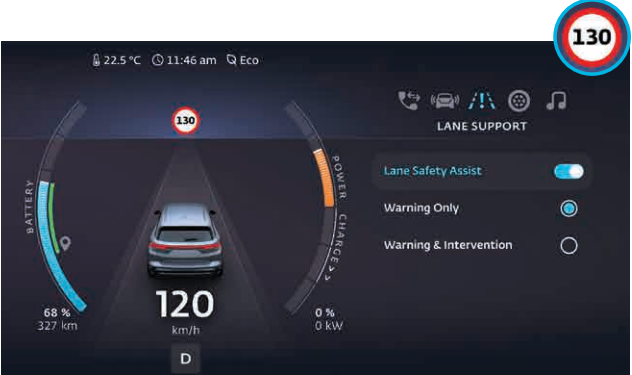

Emergency lane keeping assistant

The T10X's emergency lane keeping assistant utilizes the front camera to keep the vehicle in its lane and makes minor manoeuvring corrections. If the automatic manoeuvres exceed a defined threshold, the system warns the user to take control of the steering.

Driver monitoring system

The T10X's infrared camera monitors and analyses the driver's eye and head movements. If the system detects that the user is tired or unable to focus efficiently on the road, it sends a visual and audible warning.

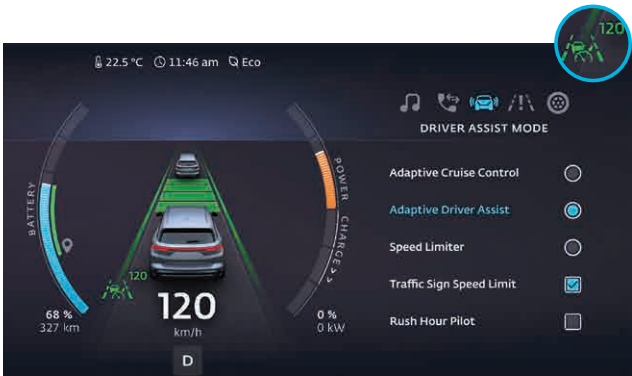

Traffic sign detection

The T10X's cameras detect traffic signs and display them on the digital display screen. The assistant systems use this information to adjust the T10X's speed and other features.

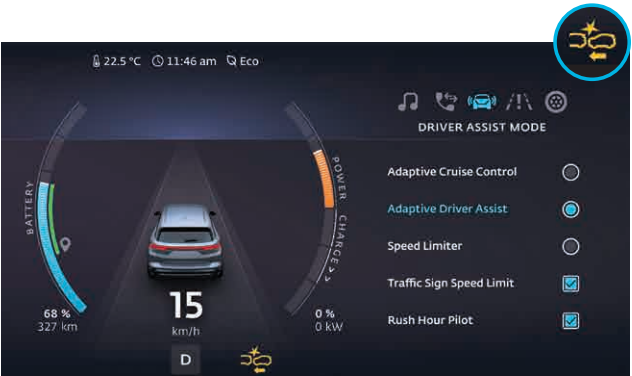

Rear cross traffic alert

Rear cross traffic alert helps prevent a possible collision when reversing by detecting traffic coming from the right or left. This system is effective in blind spots where the driver cannot see when leaving parking spaces.

Adaptive driver assist

The adaptive driver assist feature combines adaptive cruise control with stop-go functionality and emergency lane keeping system. It can track any vehicle ahead at speeds of up to 60 km/h when it is not possible to detect the lane markings on the road. It adapts to the driver's driving habits and provides a more relaxing driving experience to the user.

Forward collision warning and emergency brake

The forward collision warning and emergency brake system detects other vehicles and pedestrians on the driving route. It provides visual and audible warnings to the driver in any potentially dangerous situation and applies the brake when necessary.

T10X
design

Elegant exterior design

The T10X boasts a simple yet striking exterior design, inspired by Turkish duality, that captures both flow and power in its aesthetics. Its design is a true reflection of the diverse colours of the

Turkish geography, which make for a truly unique and eye-catching look.

The colours of Türkiye

The T10X's innovative design and meticulous attention to detail are brought to life by the vibrant colours of Türkiye. Inspired by our diverse geography, these colours offer a range of options to suit any desired look.

An elegant, stylish, technologically advanced interior

The interior of the T10X is elegant, stylish, and equipped with the latest technology. Its sharp and fluid exterior design welcomes users, while the spacious interior features hand-selected, high-quality materials that exude elegance and comfort.

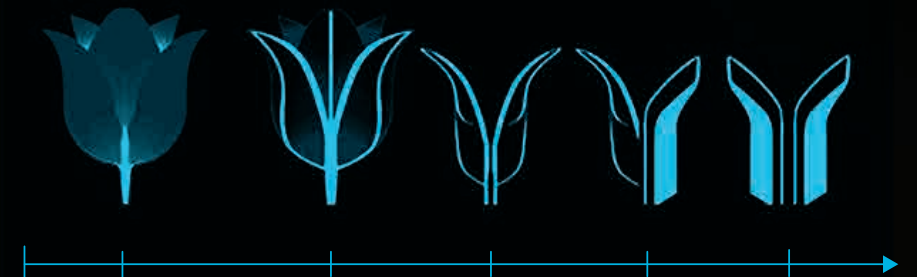

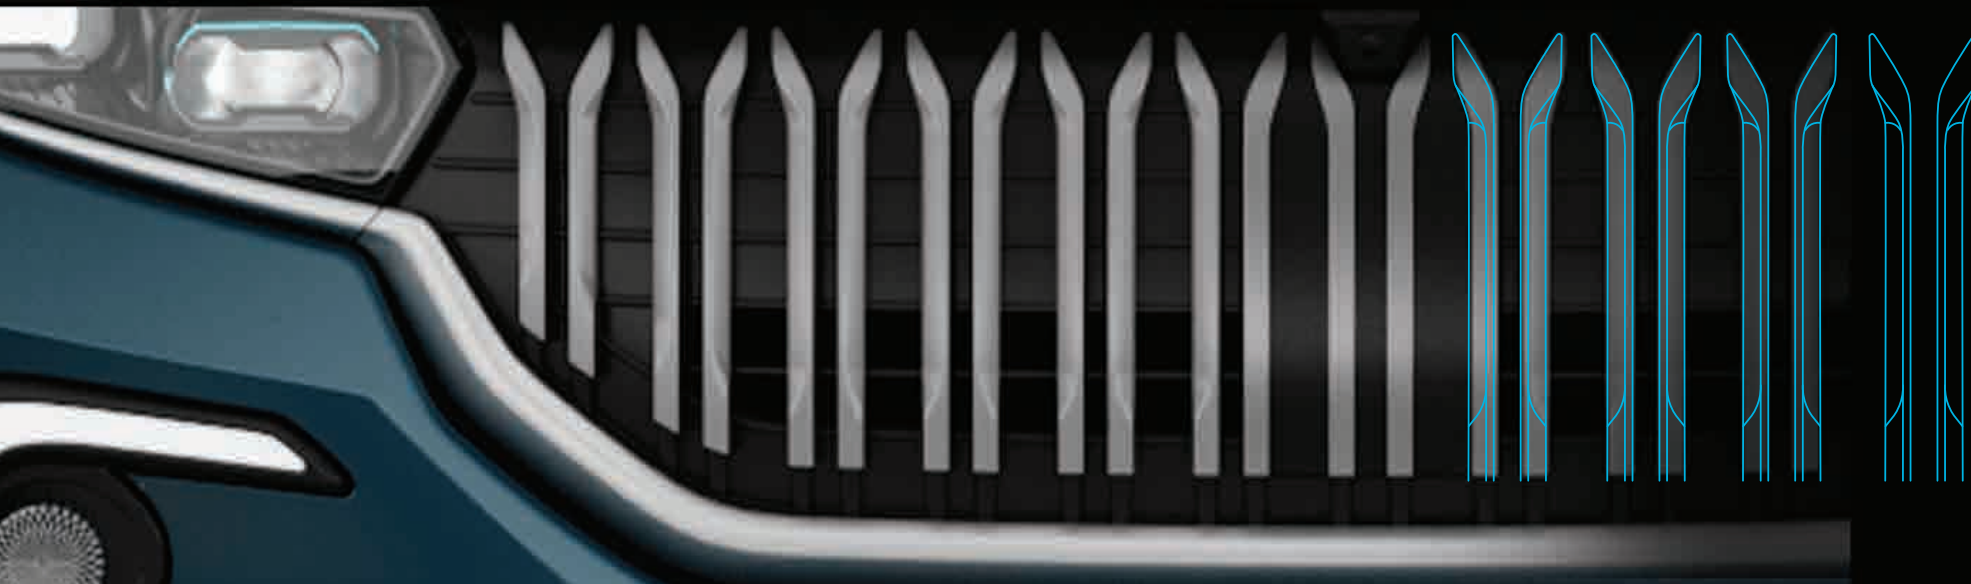

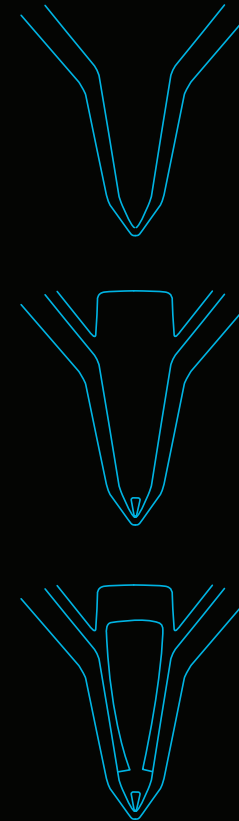

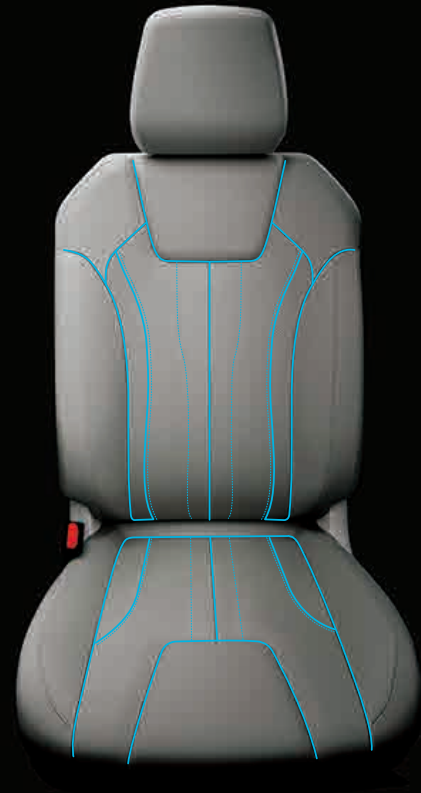

The full-size panoramic glass roof floods the interior with natural light, making long journeys more comfortable than ever.

The Origins of Inspiration

Drawing inspiration from the tulip, the iconic symbol of Anatolia, the T10X offers a modern and unique design. Tulips can be found in the smart device's signature details, including the front grille, rims, and interior. A testament to the connection between our geography and cultural heritage.

The T10X's sharp lines begin at the front and seamlessly flow through the side and rear, creating a cohesive and eye-catching look. The impressive front section features boomerang-shaped lamps, grilles, and headlights, all accented with chrome details that add to the overall elegance of the vehicle.

Human-centred design

The central console of the T10X is a standout feature that seamlessly blends style and functionality within the car's interior. Taking inspiration from aircraft cockpits, the console's shape is modern and sophisticated, while its ergonomics enable easy control of gear and electronic parking brake functions. The touch screen interface on the console is designed with the user in mind, featuring a minimalist layout that reduces control elements to the greatest extent possible. This design is further complemented by the voice command feature.

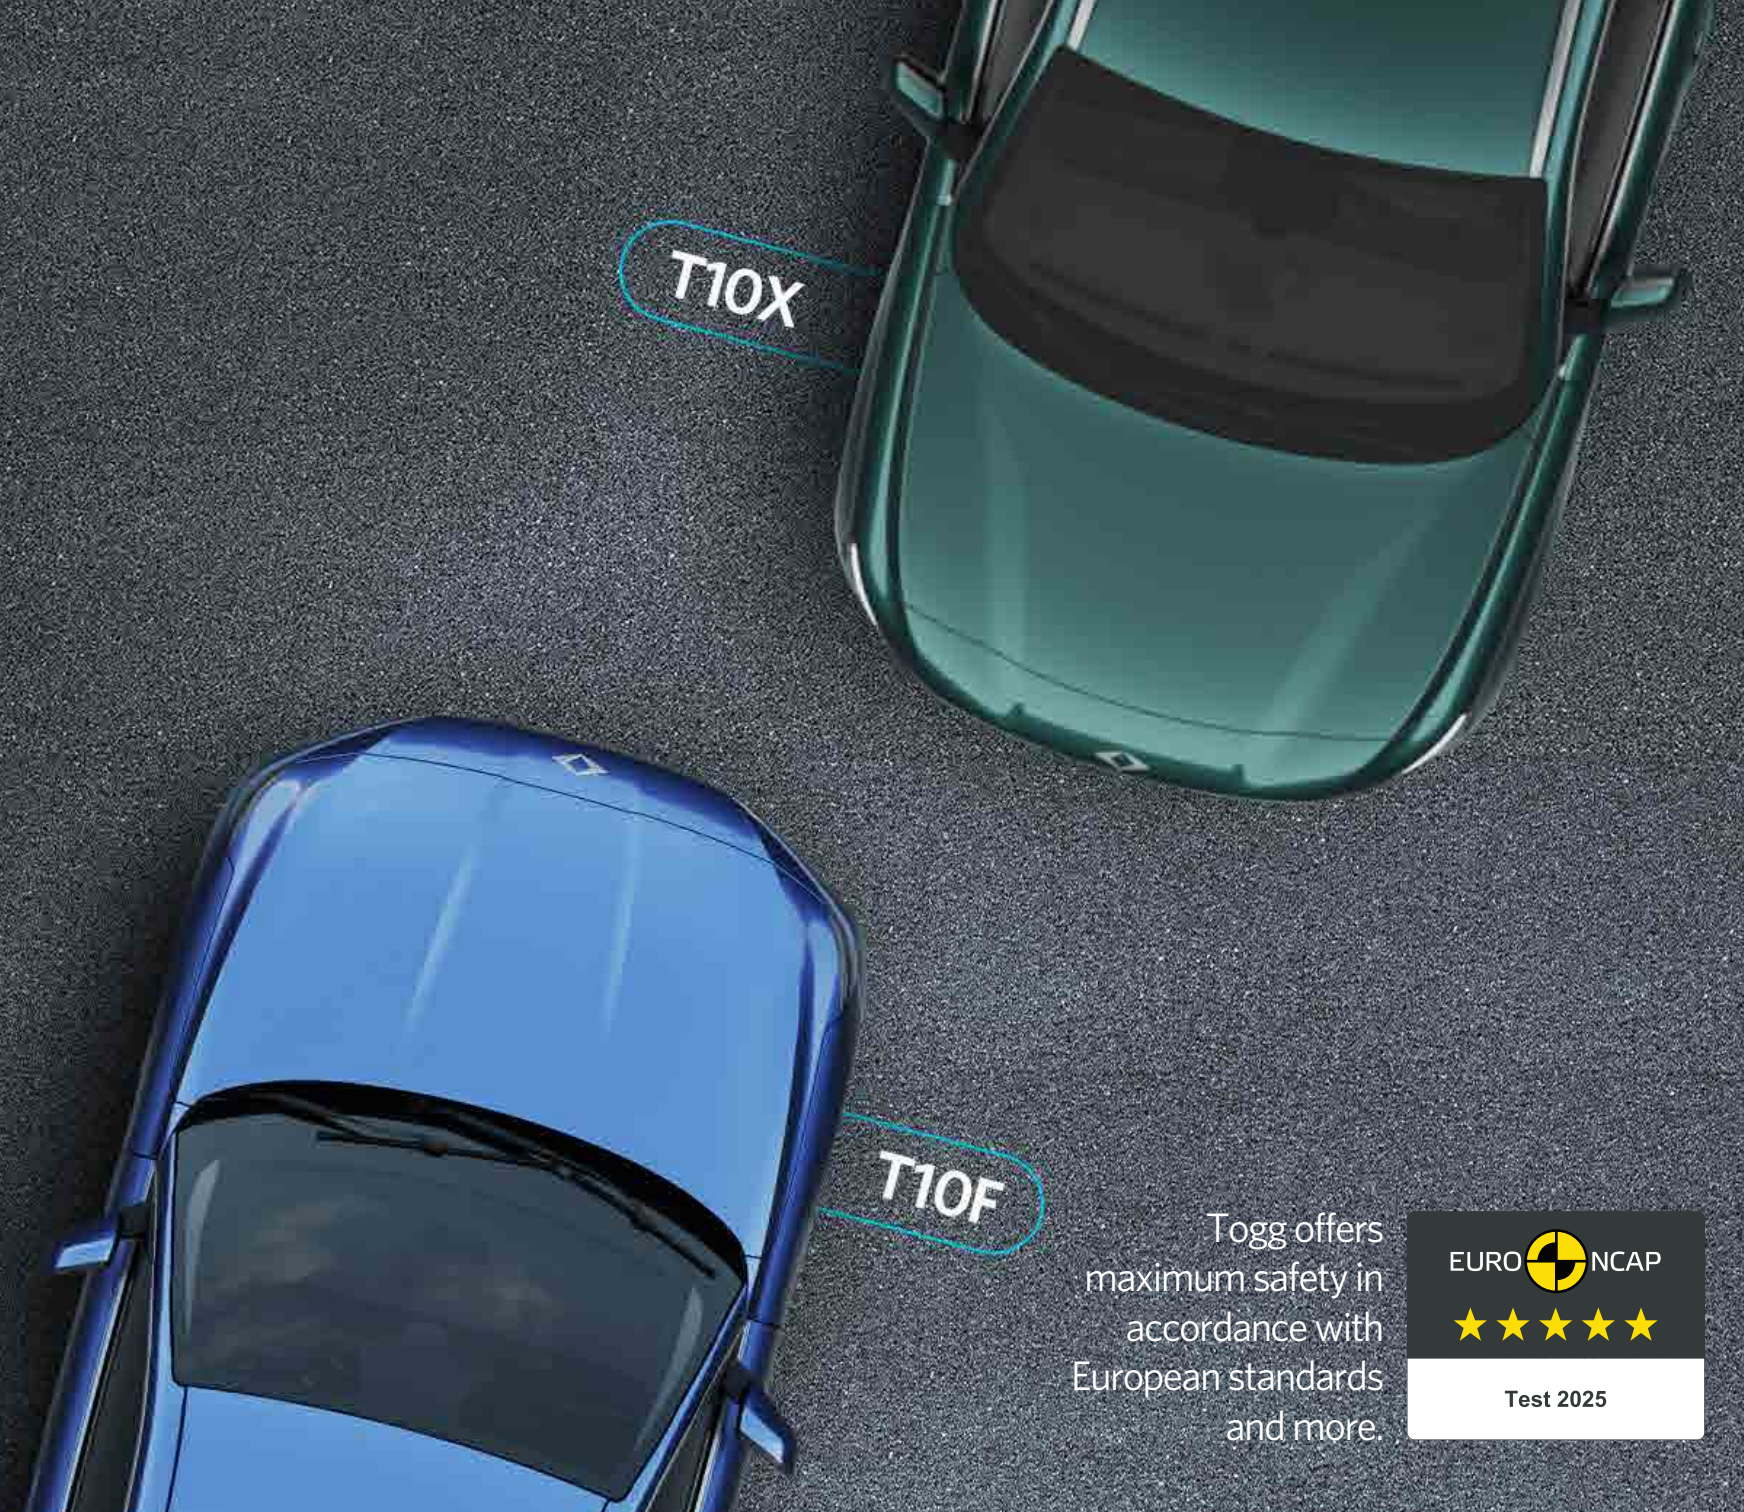

Large, spacious living area

With its long wheelbase, the T10X easily transforms into a spacious and comfortable space that can accommodate a family of five. The wide and roomy interior boasts high headroom and best legroom in its class, ensuring a superior level of comfort and relaxation on even the longest of journeys.

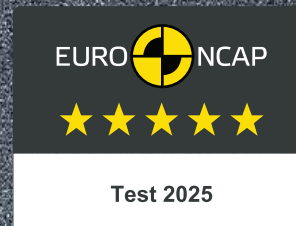

Security

Togg offers maximum safety in accordance with European standards and more.

Euro NCAP Standards

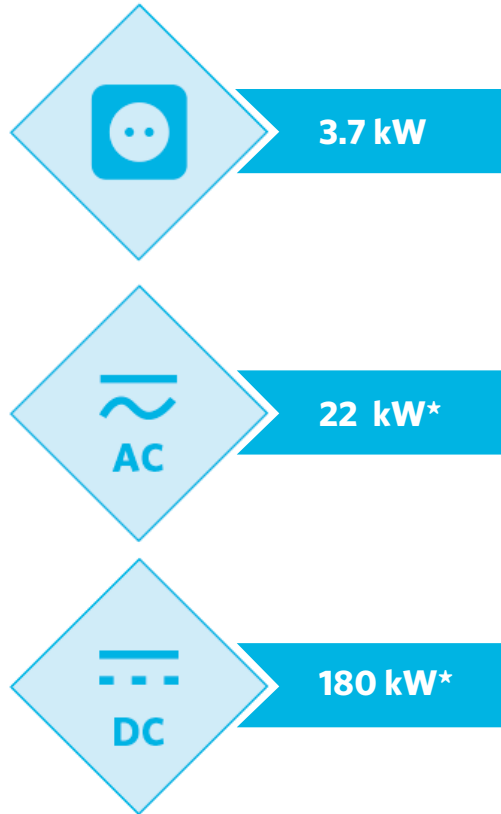

The design, production, and construction of the T10X are based on international standards. It offers safety in line with European standards and has received a 5-star rating in all tests conducted by the independent Euro NCAP testing program.

Charging

Types of charging

Charge your T10X using 3 different methods. Charging your T10X is safe and convenient, with multiple options available. You can easily charge your vehicle using a household outlet, a wall-mounted AC charging station, or any DC ultra-fast charging station.

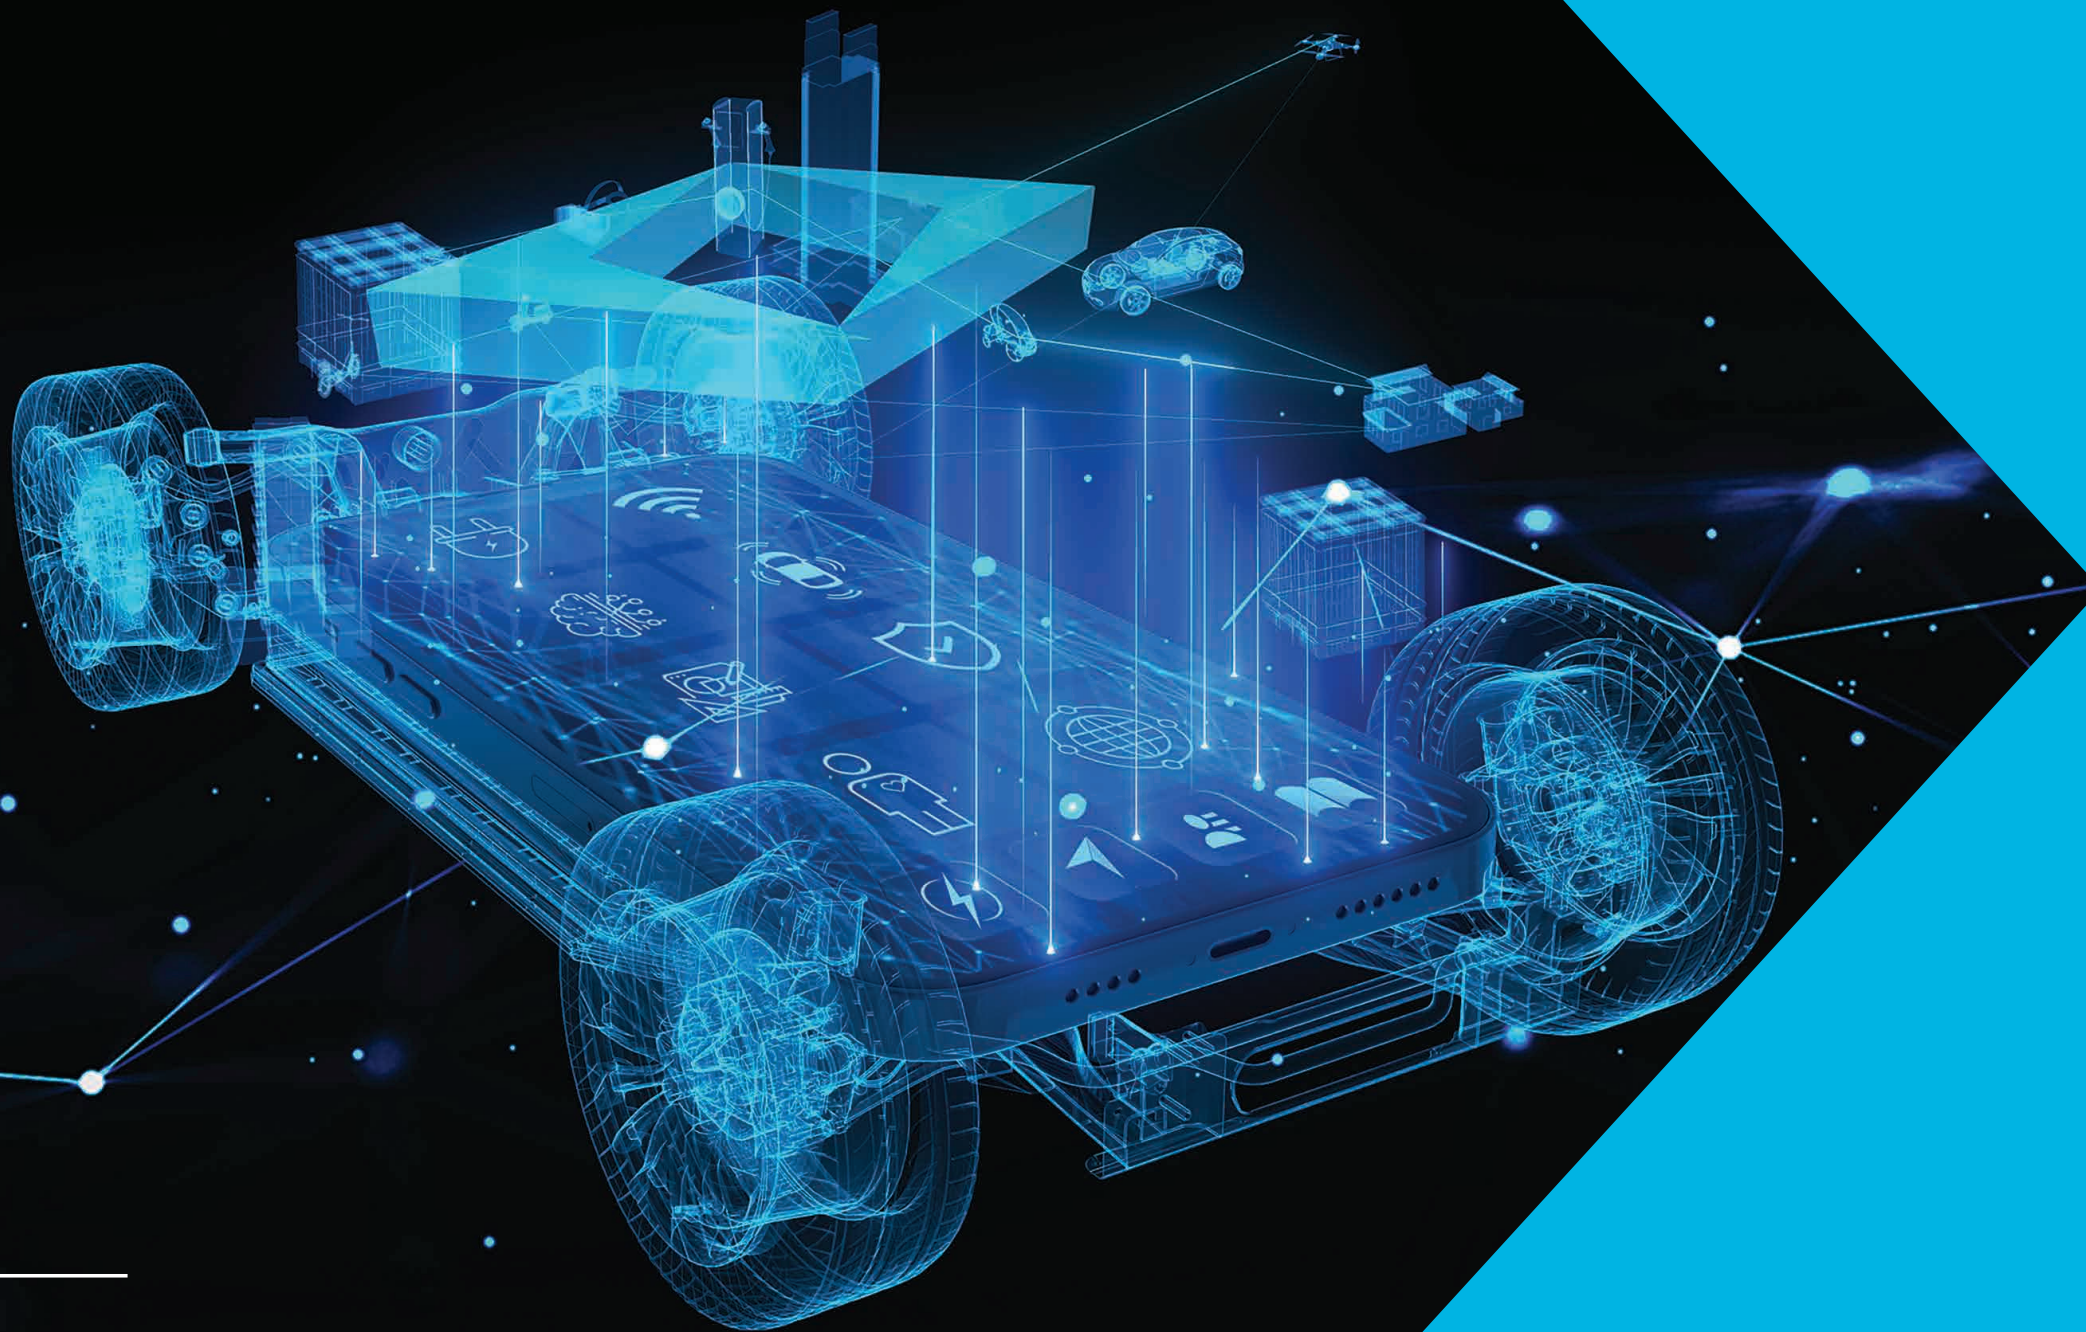

*Maximum levels.

Trugo

Trugo is an inclusive charging ecosystem that benefits all electric cars, while also providing privileged charging services to T10X smart devices. With Trugo's high-performance charging network, you can conveniently charge your smart device in all of Türkiye's 81 provinces and along intercity highways. The Trugo mobile application makes it easy to find the nearest charging station, make reservations, and process payments, simplifying the charging process for T10X users.

Backed by continuous partnerships and a robust technology platform, the next milestone of Trugo is developing cross-border network, connecting Türkiye and Germany, and shaping the future of electric mobility.
